

# Instructions for wear checks of play equipment

The equipment must be checked for correct operation and safety, especially the points listed below:

Proof of maintenance

Playground.....

Date of installation .....

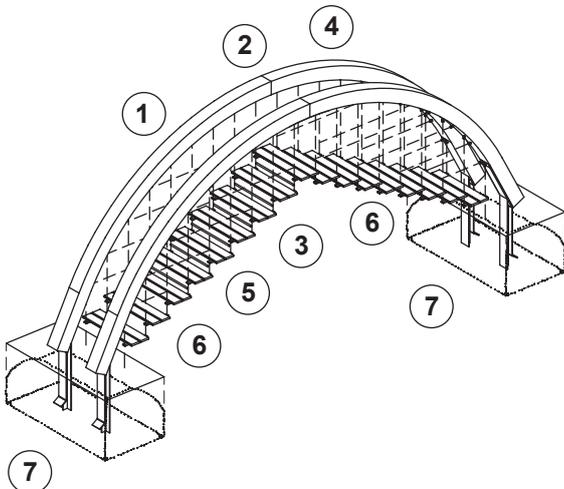

Checks depend on the type of equipment. Any equipment with moving parts must be checked at least twice a year, static equipment at least once a year.

Intervals for maintenance work and checks generally depend on

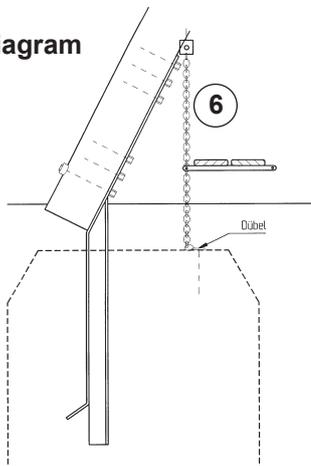

- the location
- the usage
- the frequency of use
- possible vandalism

For more details see also "General instructions for maintenance of playgrounds".

**Bow Bridge**  
Order No. 6.52500

detailed diagram

## Wooden parts

1. Check for rot and, if necessary, smooth out splinters and round off sharp edges of cracks.
2. Check that connection plates are securely connected, retighten screws/bolts if necessary.
3. Check steps for wear and tear: at least 2/3 of the material should be left, replace if necessary.
4. Recommendation: apply a breathable, opaque varnish (an opaque colour is preferable to a transparent one) to the laminated beam.

## Chain suspensions

5. Check all connections to the chains for wear and tear. The first chain link of each chain must be locked.
6. Check that the lowest chain strands are securely connected, they must be taut (see detailed diagram).

## Structural stability

7. Uncover the foundation once a year in order to check for rot or corrosion.

Special notes, e.g. for repairs

Repair not carried out, it is still possible to play on equipment

Repair not carried out, equipment is taken out of action

All work carried out, everything is in order

Maintenance carried out by:

..... Date .....
