

Play value

The Triangular Platform on Stilts is an attractive combination element for playground equipment. Its unusual shape makes the platform a very special eye-catcher. And thanks to a wide range of attachment options, such as slides, climbing nets, sliding poles or ropes, it offers a host of opportunities for play. The triangular net in the lower area invites children to sit or lie down, and the covered playing level promotes role-playing and hide-and-seek games. Moreover, they can enjoy the wonderful view from up there.

Fundamental characteristics

- Child-oriented dimensions according to ergonomic knowledge
- Numerous combination options
- Harmonious design language
- Incentive for playing: possibility to lie down, climbing up high, enjoying the view, role-playing games
- Movement: climbing, sitting, balancing

Recommended for

- School children
- Supervised play areas, such as schools, after-school programmes or similar
- Public play areas without supervision, such as playgrounds, parks or similar
- Leisure areas

Special version with slide and add-on elements

Triangular Platform on Stilts

Planning information

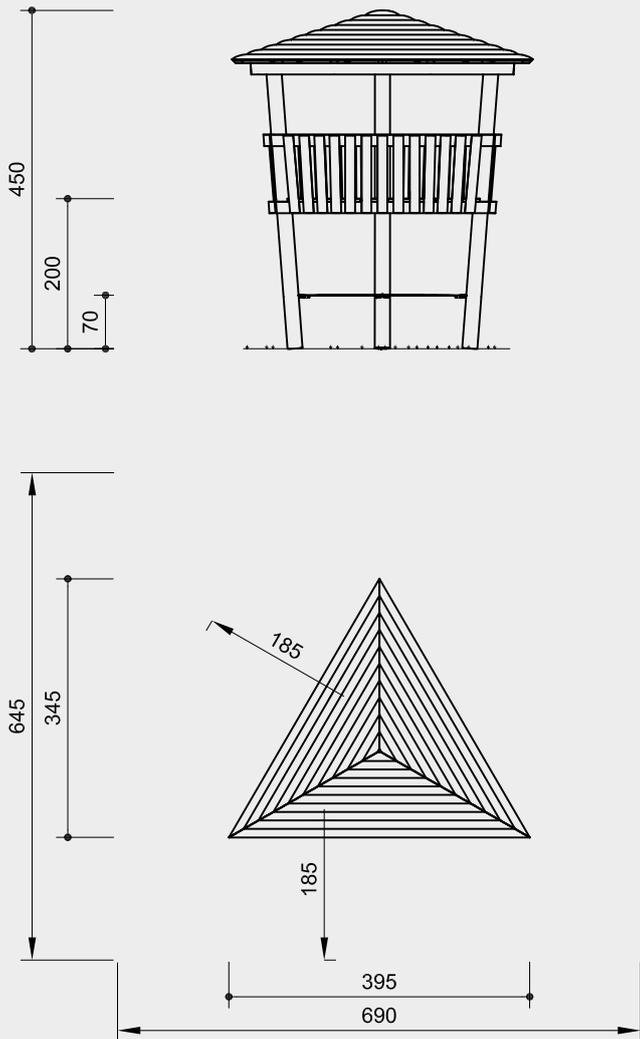

The overall plan must include an access, e.g. via a ladder, rope or bridge (not included in delivery).

 Device dimensions 
 Functional distance 

Scale 1:100

Safety check according to DIN EN 1176

Components

- 1 Platform complete with steel feet, floor and 3 parapets
- 1 Roof 3-ply
- 1 Triangular net

Installation information

Surfacing requirements corresponding to a fall height of ≤ 2.00 m (please refer to price list for more detailed information)

Foundations
 3 items 100 x 100 x 60 cm
 Excavation depth 80 cm

Attention!
Exact measurements may vary;
for all installation dimensions refer to current assembly instructions.
 Technical changes reserved.

Technical information

Equipment made of non-impregnated mountain larch

Peeled white

Palisades peeled white means that bark, cambium and sapwood are removed, the natural shape of the trunk is preserved and can be experienced

Core-free

Sawn-timbers core-free, thus decreasing occurrences of cracking and undesired changes in shape

Claddings

Claddings made of mountain larch (4 – 5 cm). Peeled white by hand, natural tree surface remains tangible and perceptible

Tongue and groove

Tongue and groove planks made of 4 cm solid wood, highly resilient, no trickling of dust / sand, protection against direct rain

Hercules rope

Hercules rope, for spliced net connections. A compound of steel rope for the core and polyester or polyamide yarn for the sheath. High abrasion resistance, 4 or 6 strands

Aluminium rope pressing

Aluminium rope pressing, cylindrically pressed, with rounded ends

Rope connection with joint

Close-fitting connection with joint, without dangerous openings, with sintered bush and adjustable screw connection

Profiled washer

Profiled washer for covering protruding screw heads according to standard, improved pressure distribution and protection against water. Impedes loosening the bolt

Adjustable

Adjustable two-piece bolt connection, easy to maintain, no projecting threads

Ground anchor

All parts used for anchoring to the ground are made of hot-dip galvanised steel or stainless steel

For more detailed explanation of the quality characteristics see price list.
